CAREER OBJECTIVE:

I am a proficient developer with eight years of commercial experience in software development, specifically in web development. By using different technology stacks and putting my academic and professional experience, I have complete exposure of how software can be designed and developed and a track record of delivering quality solutions using a range of different technologies. Concentrating on C# (PHP, LARAVEL, CodeIgniter, MERN, C#, Java Script, ASP.NET, MVC, Windows Desktop Applications).

I am also a keen proponent of agile methodologies and have successfully introduced agile techniques into projects which I have managed. I am seeking a challenging position as a Web developer, ideally in a project team developing large scale enterprise system.
